- Child Safe Clear Drying Glue
- Downloadable Bunny Head & Inside Ears Template
- Heavy Weight Printer Paper

Techniques to Know

- Basic Cutting & Gluing

Instructions:

1. Print the bunny head template on heavy weight paper and cut out the pattern. Trace the pattern onto a 3mm white foam sheet and cut out.
2. Print the two "inside bunny ear" templates on heavy weight paper and cut out the pattern. Trace the pattern onto a sheet of colored foam and cut out. Use glue to glue these inside the middle of the ears on the head.
3. Glue 1" pom poms around the edges of the bunny's ears.
4. Glue 1" and 1.5" pom poms around the edges of the bunny's head.
5. Glue eyes onto two 1" pom poms. Glue these pom poms onto the bunny face.
6. Glue 1" and 1.5" pom poms to fill in the face of the bunny, leaving a spot for the nose and whiskers.
7. Join three same color chenille stems together for whiskers. Twist together in the middle, bend the twisted middle down a bit, and separate the ends on each side to make whiskers. Trim whisker ends as desired. Glue the twisted middle down onto the foam where you left the spot for the nose.

8. Cut a 3" length chenille stem in the same color as the whiskers. Pinch it together in the middle and form the ends into a mouth shape. Bend the middle down a bit and glue the middle down in place in the spot you left for the nose.
9. Glue a 1" colored pom pom into the spot you left for the nose, so it helps hold the mouth and whiskers in place. Allow all the glue to dry.
