Tools & Additional Supplies

- Pencil
- Scissors
- Wire Cutters (optional)

Techniques to Know

- Cutting
- Basic Weaving

Instructions:

1. Choose pipe cleaner color. Beginning at the inside top of the heart, begin weaving a chenille stick in and out of the first and last holes in each row of the canvas to cover the front of the canvas. Add more chenille sticks as needed.
2. Weave a chenille stick in and out of every few holes in the border of the canvas heart shape to cover the entire border. Add more chenille sticks as needed.
3. Use scissors or wire cutters to trim the tails of the chenille sticks on the back side of the heart.
4. Create arms and legs using two chenille stems of the same color canvas. Poke each end through the canvas from the back to the front. Trim the chenille stems to form arms and legs.
5. Remove adhesive backing from two wiggle eyes and press them onto the heart.
6. Trace a plastic canvas heart shape onto the back side of a sheet of adhesive back felt. Cut out the shape, remove the backing, and press onto the back side of the heart friend.
7. If desired, the back side of the heart friends can be personalized using a marker or pen (i.e: to and from, etc.).
8. Repeat above steps to make additional heart friends.
