Techniques to Know:

Jump Rings
Gluing Beads

DIRECTIONS:

1. Fill a small bowl or container with water. Place sponge in water. Place the shell on the sponge so it is submerged in water. Carefully drill a hole through the top back of the shell to allow for attaching an 8mm jump ring to hold your chain. Attach the jump ring through the hole.
2. Cut chain to desired length.
3. Attach a 6mm jump ring to one end of the chain. Use a 4mm jump ring to attach a lobster clasp to the other end of the chain.
4. Choose the size of shell that best fits into the shell aperture and use E6000 to glue the pearl into the aperture. Allow to dry.
