

Supplies Needed

- #34770309 Silver Large Circle Metal Chain, 18" (2 pk)
- #63815138 Silver Gunmetal Small Circle Metal Chain, 32" (1 pk)
- #34708048 Silver Key and Drop Accent (1 pk)
- #34719059 Silver Metal Findings Starter Pack, 145 pc. (1 pk)

Tools Needed

- Needle Nose Pliers (2)
- Wire Cutters
- Large Dike or Side Cutters (optional but can be very helpful to cut the thicker circle chain links)

NECKLACE INSTRUCTIONS: (Size can be adjusted by using more or fewer links.)

1. Use wire cutters (larger dike or side cutters may be needed) to cut open and remove one chain link from the large circle metal length of chain. Use needle nose pliers to separate two five-link lengths of small circle metal chain. Open an end link on one end of both five-link lengths of small circle chain. Connect each open link to an end link on each end of large circle chain.
2. Cut a 19" length of small circle chain.
3. Lay both lengths of chain (from steps 1 & 2) side by side. Use one 6mm jump ring to connect the circle side of a toggle set to one end of both chains. Attach one 6mm jump ring to the other end of both chains. Use another 6mm jump ring to connect that jump ring to the bar side of the toggle set. (The extra jump ring on this side allows the bar side of the toggle to fit easier into the circle side.)
4. Remove the jump ring and metal rose from the silver key and drop accent. Set those aside. Open and remove the large circle at the top of the key accent and discard. Attach the jump ring on top of the accent to the middle link of small circle chain so it faces forward.

BRACELET INSTRUCTIONS: (Size can be adjusted by using more or fewer links.)

1. Use wire cutters (larger dike, or side cutters may be needed) to cut open seven individual links of circle chain. Use needle nose pliers to make sure the circle links are closed snugly. Lay these circle links out in front of you, side by side with texture design side facing up.
2. Separate sixteen individual links of small circle chain. Use two small circle links in between each large circle link (smooth sides of small circle links facing

towards one another) to consecutively connect the seven large circle links together. Attach two more small circle links (smooth sides facing toward one another) to the first and last large circle links.

3. Use a 6mm jump ring to connect the two small circle links on one end of the chain (from the previous step) to the circle side of a toggle set and the jump ring of the metal rose (set aside in step 4 of the necklace instructions).

4. Attach a 6mm jump ring to the two small circle links on the other end of the chain. Use a 4mm jump ring to connect that jump ring to the bar side of the toggle set.

EARRING INSTRUCTIONS:

1. Separate a single large circle link of chain. Cut a six-link length of small circle chain.

2. Attach the link on one end of the length of small circle chain to the large link of circle chain.

3. Attach the link on the other end of the length of small circle chain to the loop on the bottom of an ear wire making sure the right side of the large circle chain link is facing forward.

4. Repeat steps 1-3 for the matching earring.
