Techniques to Know

Tracing, Cutting & Gluing

Instructions:

1. Download, print, trace, and cut out 4-leaf clover template on heavy weight paper. Use black marker to trace around a 4-Leaf Clover templates on the back side of a green sticky foam sheet. Flip the template over and trace around another 4-leaf clover shape. Cut out the two 4-leaf clover shapes.
2. Cut two 5/8" x 14" lengths from each red, yellow, blue, and green foam sheet. Cut three or four 5/8" x 14" lengths from the purple foam sheet.
3. Remove the adhesive backing, from the top portion only, of the two cut out green 4-leaf clovers. Carefully line up and press the two sides together.
4. Remove the remaining adhesive backing from one 4-leaf clover. Press a dowel handle onto the bottom middle of that side so it lines up with the inside of the stem of the 4-leaf clover. Press the top of the following foam sheet strips, from step 2, in order, along the bottom of that side of that 4-leaf clover: red, yellow, green, blue, and purple. Flip the joined 4-leaf clovers over and glue strips onto the back of that 4-leaf clover, in the opposite order. Use the extra purple strips to fill in, as needed, to cover the dowel.
5. Place dots of glue, where desired, onto the surface of one side of the joined 4-Leaf Clovers. Use the KATANA or tweezers to place gold sequins onto

the dots of glue. Allow to dry. Turn 4-Leaf Clover over and repeat this step on the other side.
